23 Course Requirements

(e.g: students should have a computer, internet connection, webcam, account on a specific software/platform...etc):

24 Course Policies:

A- Attendance policies:

- Attendance will be taken periodically throughout the semester.
- Students are expected to attend and actively participate in the Microsoft teams
- When the student is unable to attend class, it is a courtesy to notify the instructor in advance using either e-mail or phone.
- Students who miss the lecture (or any portion of class) are responsible for the content. Any student who misses a class has the responsibility for obtaining copies of notes, handouts, assignments, etc.

from class members who were present. If additional assistance is still necessary, an appointment should be scheduled with the instructor.

• An absence of more than 15% of all the number of classes, which is equivalent of (2 labs) requires that the student provides an official excuse to the instructor and the dean.

B- Absences from exams and handing in assignments on time:

- Exceptions for make-up exams and late submission of class assignments will be made on a case-bycase basis for true personal emergencies that are described as accepted by the regulations of UJ (e.g., documented medical, personal, or family emergency).
- Make-up exams will be arranged if justifications for missing the exam satisfy the above. It is the student's responsibility to contact the instructor within 24 hours of the original exam to schedule a make-up session. Late assignments will not be accepted and submission of assignments (due to unjustified absence from class) by other students will not be accepted regardless of how much work the student put into its preparation.

C- Health and safety procedures:

- Students will not be in direct contact with patients during this course while attending the vedios.
- D- Honesty policy regarding cheating, plagiarism, misbehavior:
 - Students are expected to observe all University guidelines pertaining to academic misconduct.
 - Any work submitted by a student for academic credit must be the student's own work. Submission of
 work taken directly from another source (e.g., book, journal, internet, clinic forms, or another student
 work) will be considered plagiarism and the student/group will get a zero grade for that work if part of
 an assignment. In addition, if copying occurred, both the student who copied the work and the
 student who gave material to be copied (if applicable) will receive a zero for the assignment.
 - Students are expected to do work required for assignments on their own. Asking other instructors at the JU clinic or the staff, or other students to assist in or do any part of the assignment for them will negatively affect their grade on that assignment. The course instructor is the person the student needs to talk to if s/he has any difficulties pertaining to an assignment or project and is strongly encouraged to schedule an appointment with the instructor if such difficulties arise during the semester.
 - Course materials prepared by the instructor, together with the content of all lectures and review sessions presented by the instructor are the property of the instructor. Video and audio recording of lectures and review sessions without the consent of the instructor is prohibited.
 - Any forms of academic misconduct will be handled according to the University of Jordan guidelines.

E- Grading policy:

Grading for this course will be determined based upon the accumulation of points for variety of assignments and exams. All work will be evaluated on completeness, organization, clarity of information, and the integration and application of the material.
